

polly wood

Chair

Design

Polly Wood is a direct reference to the honest materials used to create this product. Standing proud on a solid oak or walnut base, Polly Wood offers a very comfortable sit and an aesthetically pleasing shape, allowing it to blend effortlessly into any environment.

Proving very popular in the hospitality industry, Polly Wood is luxurious, providing opportunities for other sitting postures, increasing comfort over longer periods of time.

Technical

Polly Wood has a polypropylene seat shell that is available in six standard RAL colours, with a solid oak or walnut base; chair, counter height stool or bar stool.

The Polly Wood chair shell is moulded from glass re-enforced Polypropylene and is available in a choice of six standard RAL colours. The glass re-enforcement is how the slim aesthetic of the chair is achieved and also provides the controlled flex of the chair. Polly Wood's base is constructed from solid oak or walnut and nothing else, as a chair, counter height or bar stool.
